12 Things That Should Never Go Down Your Drain

**In the Kitchen**
- Fats, oils, and grease

**Bathroom Items Like**
- Contact lenses
- Medication

Could impact the environment if not effectively removed during treatment.

So help us keep these things out of your plumbing.

The environment deserves it, and so do you!

**Other Paper Products, Like**
- Paper towels
- Cotton rounds
- Toilet paper

Contribute to a large number of blockages, too.

**Dental floss, cotton swabs, and hair**

"Flushable" wipes are one of the leading causes of clogged pipes.

And those wipes you thought were "flushable?" They're not.

"Flushable" wipes are one of the leading causes of clogged pipes.

Did you know...

Your pipes are only 4 inches at their widest.

Which makes it easy for things like dental floss, cotton swabs, and hair to cause stringy clogs in your plumbing.

And those wipes you thought were "flushable?" They're not.

"Flushable" wipes are one of the leading causes of clogged pipes.

Other paper products, like paper towels, cotton rounds, and toilet paper contribute to a large number of blockages, too.

In the kitchen, fats, oils, and grease can solidify in your pipes, and slow things down.

The environment deserves it, and so do you!
