H₂O CONTROL INTRODUCING THE RACHIO 3

New York American Water conducted extensive research to better understand how our customers use water and identify opportunities for conservation. Outdoor watering is one of the biggest culprits of high water use and high bills during the summer months. The H2O Control conservation program focuses on helping our customers understand their water use, and conserve and save money.

New York American Water is offering an incentive program for the best-in-class Rachio 3 Smart Sprinkler Controller to help our high water use customers in Long Island irrigate more efficiently. This easy to use, innovative system allows customers to monitor and manage their watering from anywhere with robust smartphone control. Customers can create tailored irrigation schedules, make automatic weather adjustments and maintain the perfect yard through the worry-free Rachio app.

SAVE TODAY

New York American Water is providing our customers with a more than 50% savings on the Rachio 3 Smart Sprinkler Controller. Customers who have qualifying irrigation systems and used more than 15,000 gallons of water per month last

I have been saving a lot of water since changing my digital controller for the Rachio. I did not have a rain sensor so my system would still turn on even though it was raining. The Rachio skips water days based on the weather forecast, I love it.

Richard S.
South Hempstead, NY

summer may be eligible to receive the Rachio 3 (valued at \$230+) for \$99. Approximately 4,200 Rachio 3 controllers are available for purchase on a first-come, first-serve basis.

SERVICE. ONE MORE WAY WE KEEP LIFE FLOWING.

Fantastic. It pays for itself in a few months time.

**John J.
North Merrick, NY**

Simple, easy setup. App is very informative. Once you set your conditions and zones, it's pretty much foolproof.

**Larry G.
Wantagh, NY**

Have seen a significant reduction in water usage. Easy to use app. Lawn looks good so far. Happy with it.

**Luis P.
Valley Stream, NY**

WATERING MADE EASY

The Rachio 3 is the most advanced irrigation controller on the market. The product is designed to help homeowners better understand their irrigation and make saving water easy and transparent.

- **Customized Zones:** Not all yards are alike. Users customize a few simple details about their landscape during a guided setup, and then Rachio will calculate precisely how much water each zone needs to thrive.
- **Personalized Schedules:** Rachio balances customized zone details with personal preferences to recommend optimal watering (days and durations) for a happy, healthy yard—without overwatering.
- **Reliable Weather Monitoring:** Avoid watering in the rain and wind. Rachio's proprietary Weather Intelligence™ uses continuously updated weather data to automatically adjust watering schedules based on the latest local forecasts. Comprehensive monitoring references more than 300,000 weather stations to provide hyperlocal scheduling adjustments.
- **Thoroughly Tested:** The controller is EPA WaterSense approved, and can save upwards of 20% of outdoor water use when compared to traditional irrigation controllers.
- **Easy Installation:** While it is easy to install the controller on your own, Rachio will work with local contractors to provide customer referrals for professional installation should they choose it. Additionally, Rachio will provide access to their leading technical support staff.
