

Divers will assist with installation of 30-inch pipe, using feel to direct the crane above and sound to ensure the pieces click into place.

Excavator on the barge in the background is moving rock that was broken up by blasting earlier this summer. Barge in foreground holds motor & generator for the pump, which keeps the cofferdam free of water.

Workers install a 48-inch tunnel that goes from the plant, under the Riverwalk, to the bank of the river and will be used to connect the new pipe.

Tennessee American Water top leaders (left) show local, state and federal officials the temporary dam next to the Riverwalk. Group photo (right) at the water plant.
